

HAZIC INVESTMENTS

Seamless 2020

Hazic Investments would like to introduce 'Seamless 2020'. This new version is our vision 2020 for the investment back office solutions for hedge funds, commodity pools, private equity funds, family offices, and other buy-side managers.

"Seamless 2020 is our futuristic vision for accounting, reporting, and administration operations for the investment managers. We are excited to present the upgraded version to the industry. We have upgraded the user interface and experience on one hand, while we have also added massive computing capabilities to the infrastructure. We have added distributed server computing along with many other upgrades to our server architecture enabling us to process a significantly large volume of transactions in no time. Seamless is used as a web-based application, and we have developed it to be more capable than a desktop application" said Manish Agrawal, Managing Director of Product Development.

Our technology partners also released its brand-new investor portal SIO (Seamless Investor Online) that enables daily and reporting directly to the investors online. SIO is immediately available to all of Hazic Investment's clients and their investors. SIO also is available for the reporting to the SMA clients of RIAs, CTAs, or other investment managers.

"We are committed to our continuous investment in technology. Building scalable technology from both the infrastructure and utility point of view is how we differentiate ourselves from our peers. While Seamless 1.0 was very capable and already ahead of its time, with Seamless 2020 we are looking to change the industry. Legacy systems will no longer be able to compete," said Nilesh Sudrania, Founder & CEO Our technology partners. "Investment Managers need more technology to reduce the cost and upgrade the timing and reporting experience for the investors. Investment Managers who care to boost their performance are tech savvy and they demand more for their investors. Our team is making this available for them and we will continue to improve our product every day."

About Seamless 2020

Seamless 2020 is Sudrania's multi-asset-class, multi-currency, scalable platform for SMAs, Single Manager Hedge Funds, Multi-manager Funds, Commodity Pools, CTAs, RIAs, Family Offices, Reg A+ funds, and Private Equity funds. It is a single database of the portfolio, fund, and investor accounting and reporting and is capable of unlimited combinations and rules for waterfall calculations, fund accounting configuration, automated fees/expense accruals, daily NAV calculation, and enhanced reporting for performance attribution, VaR reporting, and portfolio analytics.
